New Product - ArmourX Rust Sealer

Resene ArmourX Rust Sealer is a waterborne rust-conversion coating that combines excellent rust converting properties with strong adhesion to metals. When applied to a prepared rusted substrate the rust is converted into an anti-corrosive finish with a strong bond with the metal surface.

FEATURES AND BENEFITS:

- Can be used on Rusted steel, stainless steel and aluminium
- Typical coverage: 7-10 square metres per litre
- Touch dry: 3 hours @ 18°C. Allow 24 hours before overcoating.
- Can be applied by Brush or Roller or Spray.
- Technologically advanced waterborne formulation

ArmourX Rust Sealer is compatible with both waterbased and solvent based topcoats such as Armourcote 910, Armourcote 943, Equipment Enamel, 440 Industrial Primer and 805 Acrythane. For other topcoat options please discuss with your local branch.
