strates
- Excellent filling properties
- Long term hold out
- Excellent Sag Resistance
- Easy application and sanding

Benefits

- Provides a stable base for many two-pack
topcoats
- New Zealand Made

Durepox is a hugely popular and well known coating amongst yacht racers, it can be found on many race boats, including America's Cup, Volvo yachts and many racing yachts.

Durepox can be used on the underwater hull, top sides, decks and rigging as it delivers outstanding adhesion, water resistance, weight savings and full colour options in one product system.

Independent testing has shown that Durepox reduces drag compared to most other standard marine finishes. Used by Emirates Team New Zealand and other syndicates competing in the 36th America's Cup in Auckland in 2021.
