Durepox

The Choice of Champions

Xtreme Clear

A 2-pack epoxy urethane clear coating formulated for the Marine and Industrial markets. Optimised to provide increased UV, temperature and abrasion resistance. Specifically designed for foils and daggerboards for racing yachts.

Uses/Applications

- Used in Marine, on Rudders, Foils, and Dagger boards for racing yachts
- Used in wind power industries on wind turbine rotor blades!
- Used as a Clear coating or coloured Topcoat
- Can be applied to Wood, Fibreglass, Concrete, Carbon Fibre & other substrates with Durepox Primer already applied.

Features

- Higher crosslink density giving tougher coating with superior slip, mar and abrasion resistance.
- Excellent adhesion to a variety of substrates
- Excellent filling properties
- Long term hold out
- Can be tinted to give a coloured Topcoat

Benefits

- Can be applied direct to many substrates
- New Zealand Made
- Can be tinted to a variety of colours

Durepox is a hugely popular and well known coating amongst yacht racers, it can be found on many race boats, including America's Cup, Volvo yachts and many racing yachts.

Durepox can be used on the underwater hull, top sides, decks and rigging as it delivers outstanding adhesion, water resistance, weight savings and full colour options in one product system.

Independent testing has shown that Durepox reduces drag compared to most other standard marine finishes. Used by Emirates Team New Zealand and other syndicates competing in the 36th America's Cup in Auckland in 2021.
